## Volume Pricing Discounts Available

PLEASE NOTE: A "Project" is defined as < 5,000 schedule activities per schedule. For Schedules with > 5,000 activities, the user is required to purchase multiple "Projects". A schedule up to 10,000 activities will require the purchase of two (2) "Projects", 15,000 will require the purchase of three (3) "Projects", etc.

## SmartPM™ was designed to automate Advanced Schedule Data Analytics & to Create a Level Playing Field for Owners and Contractors.

SmartPM™ is a full-cycle project-based, analytics solution, which provides owners with a 360-degree-view of every project within their portfolio. At its core, SmartPM™ leverages the powerful data contained in construction project schedules as the foundation to managing cost & schedule risk, calculating delays & cost overruns, and predicting & addressing future risk issues.
