404.329.3000

Elevates your CPM scheduling software (MS Project, Oracle Primavera, ASTA) to create **active project controls**, adhering to construction industry best practices and guidelines.

99%  
Guaranteed Uptime

90%  
Reduction in Analysis Time

85%  
Customer Satisfaction

SmartPM's intuitive dashboard and project workspace use graphic visualization to bring your schedule data to life. SmartPM transforms complex and abstract data into straightforward, accurate, and concise reporting of key factors driving construction projects.

**GAIN VISIBILITY** SCHEDULE QUALITY ANALYSIS

Improve schedule quality to generate trustworthy and effective schedules that result in better outcomes:

- Schedule Compression
- Schedule Quality Analysis
- Quality Editor
- Data Export

**REDUCE RISK** EXECUTIVE DASHBOARD & PROJECT WORKSPACE

Monitor schedule performance across your entire portfolio to keep your projects and schedules on track:

- Project Health
- Performance Index
- Schedule Feasibility
- Forecasted Completion Date

**SAVE TIME** PREDICTIVE ANALYTICS & RISK ANALYSIS

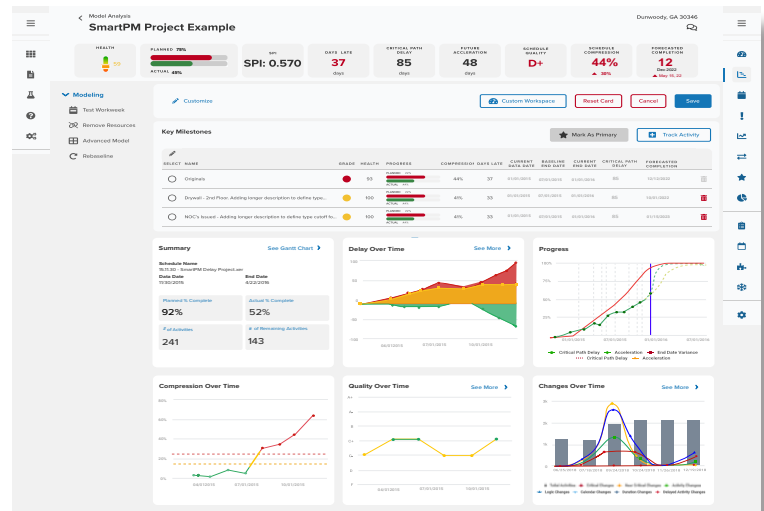

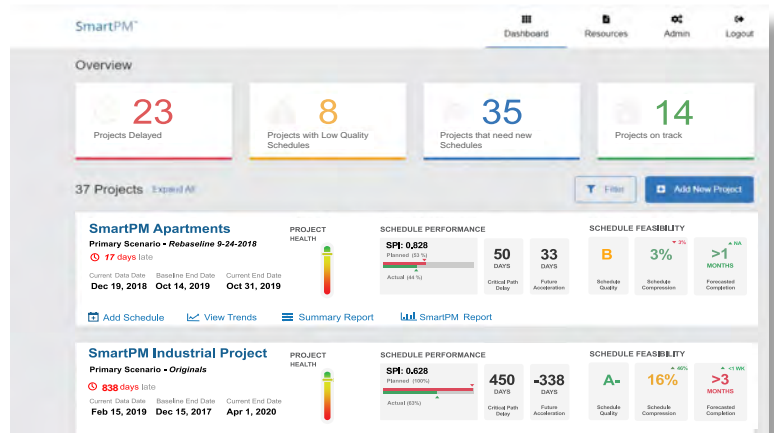

Reduce schedule delays, cost overruns, claims, and disputes by making data-driven decisions:

- Change Log
- Delay Analysis
- Trend Reports
- Historical Critical Path

**CUT COSTS** AUTOMATED REVIEWS & REPORTS

Eliminate time-consuming manual processes and spreadsheets by automating your analyses, reports, and review processes:

- SmartPM Report
- Automated Delay Analysis
- SmartPM Summary
- Start/Finish Report

Native integrations ensure users can be up-and-running in minutes, and implemented across your organization within days.
